 - Inspections & PM Schedules
 - Team Leadership
-

PROFESSIONAL EXPERIENCE

Sam Peters Transport – Chicago, IL

Maintenance Supervisor (2000-2009)

Planned, coordinated, and supervised a team of up to 20 in performing preventive maintenance, troubleshooting, and repairs to heavy equipment. Established work schedules, initiated and delegated work orders, and oversaw shop compliance with state and federal regulations and ISO 9000 guidelines. Maintained administrative records in the Fleet Management System (FMS) to ensure 100% accuracy and completeness. Negotiated contracts for outside labor, as needed, and procured parts to maintain adequate inventory stock levels.

“You have the ability to do whatever it is you set your mind to...I can never thank you enough for the loyalty you showed me and the job you did for Sam Peters Transport.” — Supervisor

Selected Contributions:

- **Recognized for operating for 3 years with zero lost-time incidents;** implemented safety training programs—in collaboration with the Safety Director—to ensure safe and efficient operations of a shop maintaining up to 100 trucks used to transport GM automobiles to dealers.
- **Instrumental in driving adherence to quality and safety standards;** facilitated monthly shop-wide safety meetings to share best practices and performance improvement opportunities, as well as to highlight terminal-based concerns to avoid duplication.
- **Controlled a parts budget of \$200K,** working diligently to minimize expenses and maximize profitability by keeping a close eye on cost-per-mile metrics.
- **Demonstrated strong understanding of regulatory guidelines** and their impact on daily operations, serving as a “go-to” person for all DOT- and OSHA-related questions.
- **Planned and managed the relocation of the entire shop** from a 30K sq. ft. to a 2K sq. ft. space, orchestrating all logistics involved from initial planning through move and final setup.
- **Joined forces with contractors to rebuild the shop after it was devastated by a tornado;** credited with creating a more efficient footprint and getting the business up and running quickly.
